

ADEBAYO DANIEL O.

Full-Stack Developer | Systems Thinker

Lagos, Nigeria | +234 807 197 9393 | blurrydan01@gmail.com

GitHub: github.com/Master-Daniels | Twitter: @Mr_Blurrydan

PROFESSIONAL SUMMARY

Results-driven Full-Stack Developer with 5+ years of hands-on experience building high performance, scalable systems in FinTech, Web3, and EdTech. Deep expertise in React/Next.js frontends and Golang microservices, complemented by strong foundations in PHP, Python, Node.js, and Java. Proven track record of designing concurrent backend architectures, optimizing complex data flows, and shipping secure, production-grade applications that serve hundreds of thousands of users. Passionate about clean code, algorithmic efficiency, and mentoring the next generation of developers.

TECHNICAL SKILLS

Frontend → React.js, Next.js, Svelte, TypeScript, Tailwind/CSS-in-JS, ShadcnUI, React Query, Jest + RTL

Backend → Golang (Gin, Echo, goroutines, channels), Node.js (Express, Hono), Python (FastAPI, Django), PHP (Laravel), Java (Spring Boot), REST & GraphQL

Databases → PostgreSQL, MySQL, MongoDB, Redis,

DevOps & Tools → Docker, GitHub Actions (CI/CD), Linux, Nginx, AWS basics, Jira, Notion, Postman

Core CS → Data Structures & Algorithms, System Design, Concurrent Programming, Clean Architecture

PROFESSIONAL EXPERIENCE

Onboard (Crypto Wallet & CEX Platform)

Frontend Developer → Jan 2023 – 2025

Designed and implemented critical client-facing interfaces using **React** and **Next.js** for global contractor payroll and HR compliance dashboards.

- Optimized application rendering and asset loading, achieving a **10% improvement in perceived load time** for the main user dashboard.
- Ensured pixel-perfect, responsive design across the platform using **Tailwind CSS** and managed complex application state via Redux/Context API.

Bitpowr (Institutional-Grade Digital Assets Infrastructure)

Full-Stack Developer → Jan 2021 – 2023

- Led frontend development for a multi-chain wallet dashboard (Next.js, Tailwind CSS), supporting **400K+ wallets** across 5+ blockchains.
- Delivered critical security features, including AML/KYT compliance modules, contributing to **2M+ secure transactions**.
- Enhanced UI/UX architecture and performance tuning for complex, data-heavy FinTech dashboards.

UniHive Africa (EdTech Startup)

Full-Stack Developer → 2020 – 2025

- Built a computer-based testing (CBT) platform for 3+ African universities serving 25K+ students using React + PHP + MySQL.
- Optimized complex result-calculation queries, reducing average report generation from 12 seconds to <2 seconds.
- Worked on rendering complex syntax for special courses such as mathematics, chemistry, physics etc
- Implemented role-based access control and real-time proctoring features that increased platform reliability during peak exam periods.

Freelance & Open-Source Contributor → 2019 – Present

- Delivered 12+ production full-stack projects (FinTech dashboards, e-commerce, AI integration, SaaS tools) using React, Next.js, Golang, Node.js, and Python.

EDUCATION

B.Sc. Computer Science (Second Class Upper | CGPA 4.25/5.0)

Federal University Lokoja, Kogi State → Graduated 2024

Relevant Coursework: Data Structures & Algorithms, Operating Systems, Database Systems, Computer Networks, System Design

CERTIFICATIONS & ACHIEVEMENTS

- Zuri/HNG Internship Finalist 2022 & 2023
- Andela x Google Hackathon 2023 (Golang category)
- Udacity Nanodegree Scholarship awardee
- Currently learning Rust for systems programming

Why Companies Hire Me

- I think in systems, not just code – I design for scale from day one.
- I ship fast without sacrificing quality (TDD, CI/CD, monitoring).
- I explain complex technical concepts clearly to both engineers and stakeholders.
- I level up every team I join through mentorship and documentation.

Ready to bring battle-tested full-stack expertise to your next big challenge. Let's talk!
