

Adebayo Daniel O.

Full Stack Web Developer

adebayooluwasegun011@gmail.com | (+234) 807-197-9393 | [portfolio website](#) |

github.com/Master-Daniels | Ikeja, Lagos, LG

Professional Summary

Highly skilled Full Stack Web Developer with over three (3) years of experience designing, developing, and deploying robust web applications. Proficient in front-end and back-end technologies, with a strong focus on delivering scalable, user-centric solutions. Adept at collaborating with cross-functional teams to drive project success, optimize performance, and enhance user experience. Passionate about leveraging modern frameworks and best practices to build efficient and maintainable codebases.

Technical Skills

- **Languages:** JavaScript (ES6+), TypeScript, Python, Golang (Go), HTML5, CSS3, SQL
- **Front-End:** React, NextJs, Vue.js, Redux, Tailwind CSS
- **Back-End:** Node.js, Express.js, NestJs, Django, Flask, RESTful APIs, GraphQL
- **Databases:** MongoDB, PostgreSQL, MySQL
- **Tools & Platforms:** Git, Docker, AWS, Vitest, CI/CD pipelines (Github Actions)
- **Other:** Agile/Scrum, Test-Driven Development, Microservices Architecture

Professional Experience

Full Stack Web Developer

Bitpowr, Remote

March 2024 – November 2024

- Built a customer-facing landing page built using Nextjs, incorporating efficient rendering techniques for faster load times.
- Worked on a FastAPI server for handling payments on the platform
- Developed an email rendering and sending template on both the fronted and the backend
- Implemented monitoring and tracking using sentry to report on any bugs encountered in production.
- Utilized AWS services (EC2, S3) for hosting and storage, ensuring 99.9% application uptime.
- Participated in Agile sprints, contributing to sprint planning and code reviews to maintain high code quality.

Frontend-stack Web Developer

Zine Wallet (Startup, Remote)

October 2024 – Present

- Developed front-end components using React(vite) and TailwindCSS, enhancing user interface responsiveness.
- Assisted in building RESTful APIs with NestJs(NodeJs), supporting seamless front-end and backend integration.
- Worked on integrating various crypto payment providers on our platform to facilitate easy payment
- Contributed to our CI/CD pipeline using Github actions, tweaking Dockerfiles and optimizing build for production environment
- Interface with hosting providers (AWS, Render) to solve issues on production

Education

Bachelor of Science in Computer Science Federal University Lokoja, Lokoja, Kogi State

Graduated: October 2024

- Relevant Coursework: Web Development, Software Engineering, Data Structures, Data Structure and Algorithms, System Architecture
- Capstone Project: Developed a full stack AI summarization application using React and NodeJs

Projects

Personal Portfolio Website

[Portfolio website](#)

- Designed and deployed a personal portfolio using Nextjs and Tailwind CSS and Framer Motion for animations, showcasing professional projects and skills.
- Optimized site performance, achieving a Google Lighthouse score of 95+.

Trello Clone

[Trello Clone](#)

- Developed a Trello clone using Next.js, leveraging server-side rendering and static site generation for optimized performance.
- Integrated Supabase for real-time database operations and authentication, supporting seamless task management for 100+ concurrent users.
- Deployed application on Vercel, ensuring automatic scaling and high availability.
